

## **Supply Insight Job Posting for Entry-Level Engineer Position**

**Start Date: July 1, 2010**

**End Date: September 30, 2010**

### **Overview**

Supply Insight, a Newington-based RFID/Auto-ID edgware and middleware ISV, is seeking a full-time, entry-level to mid-level Java/C# software engineer to join a growing team developing next generation products. Come work for an early stage company with products and customers where your talents, initiative and contributions will be rewarded with the company's continued growth. We will interview applicants with strong Java/C# development and design skills with proficiency in Eclipse and/or Visual Studio, and SQL/database development skills with familiarity in MySQL, Postgres and/or SQL Server. Familiarity with J2EE (Spring), JMS or Web Services, Flex (ActionScript/BlazeDS), Apache/Tomcat, and/or RFID/Auto-ID are considered a plus. Some travel is required. Salary is competitive. D.O.E. Send resume and salary requirements to [jobs@supplyinsight.com](mailto:jobs@supplyinsight.com).

### **Required Skills**

- Java and/or C# development and design experience with proficiency in Eclipse and/or Visual Studio
- SQL/database development experience with familiarity with MySQL, Postgres and/or SQL Server
- Initiative and eagerness to enhance development skills
- Independent, driven coder looking to think creatively to solve real world problems

### **Advantage Skills**

- J2EE (Spring), Flex (ActionScript/BlazeDS), Ant/Maven, Subversion
- Transport protocols (JMS, Web Services/SOAP, RMI)
- Web Servers (Apache/Tomcat), Application Servers (JBoss)
- RFID/Auto-ID technologies and standards

### **Our Company**

- URL: [www.supplyinsight.com](http://www.supplyinsight.com)
- RFID/Auto-ID edgware and middleware software development company
- Founded 2004
- Several products at v1.0 stage
- Growing aggressive company

**Salary:** D.O.E.
