

About us**A distinctive RFID Software Company**

Supply Insight, Inc. was formed as EPC Integrator in 2004 and became Supply Insight, Inc. in 2005. The company developed several custom software applications for its clients while developing the framework for rPlatform™. Supply Insight has fully exploited its development strengths in producing state-of-the-art and "best of breed" software for managing RFID data from the edge to the enterprise level.

Supply Insight, Inc. is headquartered in Newington, Connecticut and we have pool of highly talented software engineers based in Bangalore, India and in other global IT locations.

Supply Insight's executive team brings many years of experience in managing software development, growing successful small companies and executing sales and marketing strategies.

Our Value

- We are a proud member of the EPCglobal™ community and all of our products conform to EPCglobal standards.
- Our software products are hardware agnostic. They integrate with active, passive, semi-passive and Wi-Fi technologies.
- Our software products transcend compliance providing our customers maximum value from their implementations.
- Our featured rich products are delivered at a competitive price in the market.
- Our hybrid approach to RFID allows us to provide cost effective solutions to our customers by leveraging their investments in their ERP systems & infrastructure.
- We can efficiently develop new vertical products upon our existing architecture.
- We have built strong partnerships with RFID market leaders.
