

**MandatePLUS**

MandatePLUS™ for DoD is a comprehensive UID, RFID and WAWF compliance tool allowing manufacturers engaged in the supply chain for the Department of Defense to adhere to all required compliance mandates.

MandatePLUS™ for DoD allows the supplier to upload and parse a contract to extract data relevant to the production and shipping processes and then use this data to ensure accurate tagging, notification and shipment.

Once a contract is uploaded, MandatePLUS™ for DoD goes beyond your compliance mandate and offers a route to increase your efficiencies and recover your investment. This helps you to derive ROI beyond the mandates.

Supply Insight offers a complete solution, including software, installation services, tags, readers, printers and UID verification hardware for your mandate requirements.

**MandatePLUS for DoD Key Benefits**

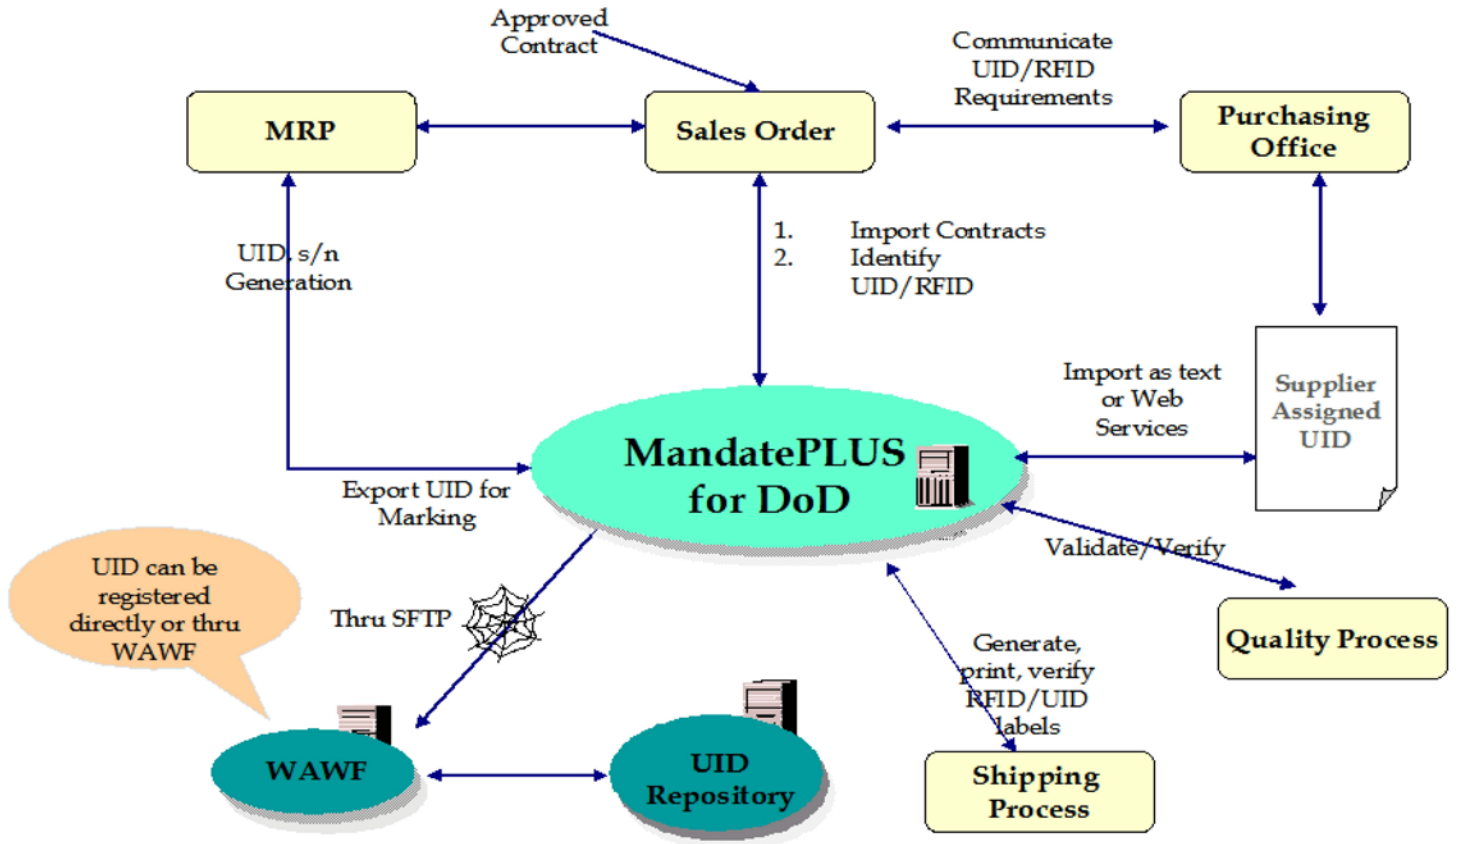

- o Open and Service oriented architecture
- o End-to-end RFID solution with integration capabilities for ERP, WMS and other enterprise applications
- o Support for RFID, UID and WAWF
