

MandatePLUS 2.2.1

MandatePLUS™ for DoD is a comprehensive UID, RFID and WAWF compliance tool allowing manufacturers supplying the Department of Defense to meet all the requirements of the mandate and more! Now shipping with rAGENT™ support for mobile RFID verification.

MandatePLUS for DoD™

MandatePLUS™ for DoD: Key Benefits

- Open and Service Oriented Architecture(SOA) based
- Support for RFID & Barcode Printing
- Support for UID and WAWF compliance
- Support for mobile device RFID tag verification
- Scalable to thousands of cases & pallets a day
- Create custom reports for analysis
- Includes barcode tagging to provide compatibility with your existing systems
- Supports Gen2 tags
- Flexible licensing model available for scalability

MandatePLUS™ for DoD is a complete solution: Contract Management, RFID, UID and WAWF Submission. MandatePLUS™ allows contractors to upload and parse a contract, extracting relevant data for production and shipping processes, and use that data to ensure accurate tagging, notification and shipment.

MandatePLUS™ offers scalable deployment possibilities. An enterprise can start small with a single location and scale up to the enterprise level. Enterprises can deploy each module separately based on their business needs and expand to other modules as desired or required.

MandatePLUS™ also offers a scalable licensing model enabling DoD prime contractors to bring their sub-contractors into compliance and communicate with them through standards based data exchange.

MandatePLUS™ for DoD: Features

- Standard Edition is powered by rPlatform™ 2.2 RFID middleware software
- RFID training and post-deployment customer support
- Support for SGTIN 64 and SGTIN 96
- Support for mixed case SSCC 64 and SSCC 96
- RFID and barcode label printing using Bar Tender 7.x or later
- Support for printing and verification of RFID labels at pallet, case and unit level
- Support for UID generation, marking and verification. Support for embedded UID using Parent-Child relationship
- Supports various databases to store and retrieve data
- Supports secure communication with WAWF
- Includes useful standard reports

Hardware/Software Support

Hardware Support

- o Windows Mobile enabled device
- o Intermec and Zebra Printers

Software Environment

- Supported Platforms**
- o Windows XP
 - o Windows 2000
 - o Linux

- Supported Databases**
- o Oracle 8i and above
 - o MySQL 5.0
 - o SQL Anywhere 11
 - o Postgres 8.x

- J2EE Servers**
- o JBoss 4.x

- Enterprise Integration**
- o Web Services, File, JMS and JDBC
